that odd piece

A LITTLE TAP. A LOT OF POSSIBILITY.

Your NFC quick guide

Ready. Set. Tap.

1

Unlock your phone.

On Android, switch on NFC in Settings.

2

Tap the marked side.

Hold the engraved curved-line symbol against the back of your phone. Move slowly to find the NFC reading spot, then hold still.

3

Open your link.

Tap the notification that appears on your phone.

Add or change your NFC link

If your tag is blank or you want a new link, open the NFC Tools app:

Write > Add a record > URL / URI

Paste your URL, tap Write and hold your phone against the engraved symbol until writing completes.

Not working?

Try removing a thick or metal phone case. An NFC-compatible phone is required.
